## PROFESSIONAL EXPERIENCE

### E-Commerce Web Dashboard Developer

Freelance Project

- Developed a comprehensive web-based control panel for online store management using Flutter Web. Features include inventory management, order tracking, analytics dashboard, and customer management system with real-time data synchronization. Implemented responsive design and optimized performance for seamless user experience.

### Food Delivery App Developer

Personal Project

- Built a full-featured food delivery application with Flutter, including restaurant listings, menu browsing, cart management, order tracking, and payment integration. Implemented real-time GPS tracking and push notifications for enhanced user experience. Utilized Firebase for backend services and state management.

### Portfolio Website Developer

Personal Project

- Created a responsive and interactive portfolio website showcasing development skills and projects. Features include contact form with EmailJS integration, project galleries, skills visualization, and optimized performance across all devices. Implemented modern UI/UX principles with smooth animations.
